Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the notch in the elongated rod (claim 2) and the second plate bottom configured to receive the circular surface of the ball (claim 10) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the specification fails to define the notch in the elongated rod first end

Art Unit: 3711

(claims 2 and 11) and the second plate bottom being configured to receive the circular surface of the ball (claim 10).

Claim Objections

3. Claims 3 and 11 are objected to because of the following informalities: in claim 3, the language "third place" should be changed to "third plate". In claim 11, the language "the elongated rod first and" should be changed to "the elongated rod first end". Appropriate correction is required.

Allowable Subject Matter

4. Claims 1-11 read over the prior art of record because the prior art fails to teach or fairly suggest the golf ball and tee placement and retrieval apparatus comprising a hollow elongated shaft, an elongated rod, first, second and third plates, resilient means and supper members, all of which are arranged and include the limitations as recited.

Conclusion

5. This application is in condition for allowance except for the above formal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
